

Agriculture

Contamination

- If agricultural products are in a suspected or known contaminated area, they will be quarantined until they can be inspected for contamination.
- Check points will be set up on roadways leaving the area to check agricultural products for contamination.

Damage Claims

- Keep records of any agricultural products that are damaged because of the accident at the depot.
- This includes products that rot because they have been quarantined, and can't be sent to market.

Food in Storage

- Any potential areas of contamination will be inspected before products are allowed to leave the area.

Harvest

- You should stop all harvest activities if you are in an area that has been told to shelter in place or evacuate.
- *Find out if the caller knows if they're in one of these areas. If they don't, find out for them, and refer them to the radio for further instructions.*

Transporting Products

- Check points will be set up on roadways leaving the area to check agricultural products for contamination.
